Server-side

Ruby Ruby On Rails MySQL

Postgress AWS Heroku

Development & Soft Skills

Jest / Unit-Test Rspec Linux-Shell

Capybara Pair-Programming Agile

Adaptability Good communication

Git Problem-solving Remote-work

PROJECTS

Lifestyle Blog

<https://github.com/ixboy/lifestyle>

A web app where users can create articles about their lifestyle activities like fashion, sports, etc. It allows image uploading, user registration, votes and much more. Built with Ruby on Rails.

Social Media App

<https://github.com/ixboy/ror-social-scaffold>

In this project I forked a sample repo of a social media App (with no functionalities) from microverse and I built on top of it a Social Media application. You can sign up with an email and password and then create posts, add other users as friends, read the posts of your friends, comment and give them a like.
